

## CityLink Tulla Widening

### Next stage of works: Melrose Drive to Bulla Road

Following the successful English Street bridge reconstruction in January 2017, widening works can now commence underneath on the Tullamarine Freeway between Bulla Road and Melrose Drive to create an extra lane in each direction.

In addition to these works, there are number of other improvements in the Strathmore/Airport West area:

- **A new signalised pedestrian crossing** on the southern side of the Bulla Road intersection to improve pedestrian access between Essendon North and Strathmore.
- **An extension of the English Street exit ramp** for north bound traffic wanting to access Essendon Fields and Airport West. This extension begins at the Bulla Road exit and removes the weave from the freeway between traffic exiting to English Street and traffic from Bulla Road merging onto the freeway.
- **Finalisation of the new lane configuration** on the English Street bridge including extra dedicated right turn lanes onto the freeway in both directions creating extra capacity and improved safety. The bridge upgrade also includes improved signage,

feature lighting and shared user paths for pedestrians and cyclists.

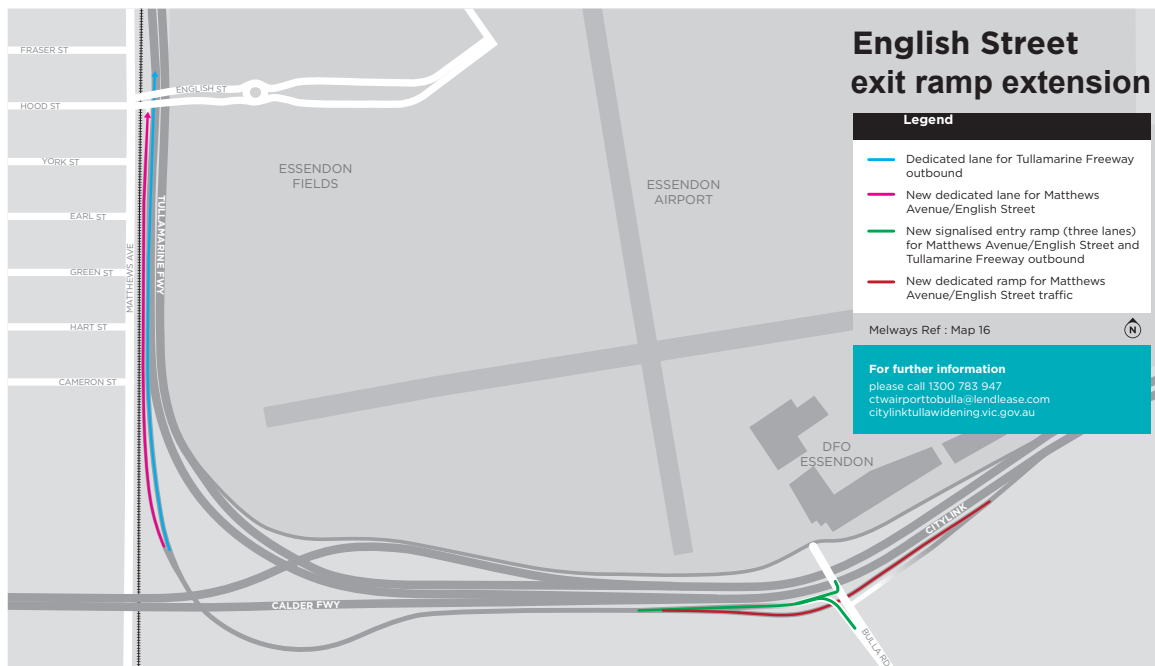

- **Freeway management systems** at Bulla Road and English Street to improve the traffic flow on the Tullamarine Freeway. More information about Freeway Management Systems can be found on our website [citylinktullawidening.vic.gov.au](http://citylinktullawidening.vic.gov.au)
- **Replacement pedestrian bridges** restoring additional pedestrian access between the important business precincts Airport West and Essendon Fields.

#### How will the construction program affect you?

Preliminary works include barrier placement, surveying and service location. There will be minimal impacts during construction but include vegetation removal, lane closures and ramp closures, night works and temporary speed limit changes. Lendlease will communicate with you in advance of all works.
